Personal Profile

6+ years of proven experience in software engineering, Research and AI. Started career with owning open source projects, wrote research publications, performed end to end full stack applications in AI across multiple domains.

Work Experience

Vitalops.ai

Founder

United States

Feb 2024 - Present

- Currently Building Openvibe, an agentic harness that runs on a loop that is an alternative to Claude Code, for automating entire Enterprise Departments with a single spec sheet.
- Built **Datatune** OSS, worked with paying customers in Supply Chain and Finance and built automated Agentic Data solutions
- Built enterprise version of datatune for handling data orchestrations for LLM training and fine-tuning, handled full stack, AI research and model training, while shipping 5 products in 10 months

Gomi.ai

Founder

Remote

Oct 2023 - Feb 2024

- Built an MVP end-to-end for a product that does sales demo automation in AI.

Aecmaster

Full Stack and AI Research Engineer

Remote

March 2023 - Oct 2023

- Led a 5-month project to integrate ChatGPT into the AEC ecosystem to understand AEC data more efficiently for customers. Built a full stack solution to make a version control alternative for AEC data that also included 3D renderings using Threejs for building construction models.
- Developed a Chrome extension for optimized data handling in ChatGPT and a real-time platform for AEC data visualization.

Autonomio

Machine Learning Engineer

Helsinki, Finland

July 2022 - March 2023

- Authored and Open Sourced **Jako**, a distributed computing tool for hyperparameter optimisation using multiple machines. Responsible for building, testing and writing documentation.
- Authored and Open sourced **EasyEnergy**, a tool to track carbon emissions and energy draw for Machine Learning Experiments. Responsible for the idea, roadmap, building, testing and documentation.

Saama

Machine Learning Research Engineer

Chennai, India

Dec 2020 - June 2022

- Worked with the Research team for innovating impact of machine learning with natural language processing in Clinical Domain.
- Wrote Research papers for NLP tasks such as **Bio Sentence Transformers**
- Worked with internal software research team to build tools to automate cross matching of medical domain databases.

Minicog

Freelance Machine Learning Engineer

Kochi, India

May 2020 - Dec 2020

- Built an open source tool named **TableQA** for querying natural language on tabular data.
- Wrote a **research paper** on TableQA.

Education

College of Engineering, Trivandrum

BTech in Electrical and Electronics

Trivandrum, India

August 2016 - June 2020

- Graduated with 8.1 CGPA on a scale of 10

Research Publications

- Research paper - **BioSimCSE: BioMedical Sentence Embeddings using Contrastive learning**
- Research paper - **TableQuery: Querying tabular data with natural language**
- Research Journal - **Deep Learning Applications with Python**

Skills

Technical Skills

Python (Tensorflow, PyTorch, Pandas, Scikit-learn), SQL, Postgres, Docker, Git, Vue.js, AWS, GCP, Ubuntu Linux, Real-time Data Analytics, Three.js, Linux tools, Apt, Scripting, $\text{\LaTeX}$, Tableau, Firebase, Hasura, Metabase

Soft Skills

Community Management, People Relationship, Time Management, Teamwork, Problem-solving, Documentation, Engaging Presentation, Leadership, Communication, Logical Thinking, Project Management, Team Coordination, Strategic Planning
