Personal Profile

6+ years of proven experience in software engineering, Research and AI. Started career with owning large open source projects, wrote major research publications, performed end to end full stack applications in AI across multiple domains, and ran a company. Also a speaker and mentor of AI across large audiences.

Work Experience

Vitalops.ai

Founder

Remote

Feb 2024 - Present

- Built and open-sourced **Openvibe** (1.5k stars), **Datatune** (146 stars), and **Opendesk** (70 stars): an agentic code harness, large-scale data transformation engine, and multi-machine computer use MCP server, altogether aimed at full scale enterprise automation
- Acquired and served paying customers in major enterprises across Supply Chain and Finance; shipped 5 products in 10 months handling full-stack engineering, AI research, and model training end-to-end, for large scale of users.

Gomi.ai

Founder

Remote

Oct 2023 - Feb 2024

- Built and launched a full end-to-end MVP for AI-powered sales demo automation, from prototype to working product in under 4 months.

Aecmaster

Full Stack and AI Research Engineer

Remote

March 2023 - Oct 2023

- Led a 5-month initiative to integrate LLMs into the AEC ecosystem, delivering a full-stack version control platform with real-time 3D construction model rendering via Three.js, serving customers across 3 enterprise accounts.
- Shipped a Chrome extension for optimized ChatGPT data handling and a real-time AEC data visualization platform.

Autonomio

Machine Learning Engineer

Helsinki, Finland

July 2022 - March 2023

- Authored and open-sourced **Jako**, a distributed hyperparameter optimization tool spanning multiple machines, reducing experiment time by parallelizing workloads across nodes.
- Authored and open-sourced **EasyEnergy**, a carbon and energy tracking tool for ML experiments, covering full ownership from ideation through documentation.

Saama

Machine Learning Research Engineer

Chennai, India

Dec 2020 - June 2022

- Published **BioSimCSE** at ACL's LOUHI workshop, a peer-reviewed clinical NLP venue, advancing biomedical sentence embeddings using contrastive learning.
- Pre-trained and fine-tuned a range of biomedical models focused on various tasks such as Question Answering adding value for biomedical AI community
- Built internal tooling to automate cross-matching across medical domain databases, reducing manual data reconciliation effort for research teams.

Minicog

Freelance Machine Learning Engineer

Kochi, India

May 2020 - Dec 2020

- Built **TableQA**, an open-source NL-to-SQL engine with 320+ GitHub stars and 9 academic citations, and published an accompanying **research paper** documenting the approach.
- Co-authored a chapter published in **Advanced Deep Learning for Engineers and Scientists** (Springer, 2021), a peer-reviewed engineering book covering deep learning applications across computer vision, biometrics, and smart grids.

Skills

AI & Agents	LLM Orchestration, Agentic Harnesses, MCP Servers, Computer Use Agents, RAG Pipelines, Fine-tuning
ML / Research	PyTorch, TensorFlow, Scikit-learn, Contrastive Learning, NLP, Sentence Transformers, Hyperparameter Optimization
Engineering	Python, SQL, Postgres, Docker, Git, Vue.js, Three.js, Firebase, Hasura, AWS, GCP, Ubuntu Linux, Scripting
Data	Pandas, Large-scale Data Transformation, Agentic Data Pipelines, Metabase, Real-time Analytics
Soft Skills	Technical Leadership, OSS Community Building, Project Management, Research Communication, Strategic Planning

Education

College of Engineering, Trivandrum

BTech in Electrical and Electronics

Trivandrum, India

August 2016 - June 2020

- Graduated with 8.1 CGPA on a scale of 10
